Saw Containment System Dry Guy

Are you tired of setting up your tile saw outdoors to avoid overspray problems? The Dry Guy Wet Saw Containment System means your wet saw can now be set up right where you are working, even over carpet or wood flooring. Because of an indoor setup, freezing temperatures, snow, rain, and tracking a mess into your customers' homes should no longer be a concern.

Water Intrusion Solution Tile Redi

The Redi-Flash Water Intrusion System from Tile Redi is designed to protect the small area between the top of the Tile Redi shower pan splash wall and the shower's backer board substrate. Redi-Flash is an aluminum guard that sits on top of the shower pan and rests flush against the substrate.
