

MultiCurb Shower Pan for corner installations

Tile Redi has announced the introduction of another innovative shower pan design for 2011 with the Tile Redi MultiCurb Shower Pan. Tile Redi shower products are easy to install and guaranteed to be 100% leak-proof, and the Tile Redi MultiCurb shower pan option has been designed for showers placed in the corner of the bathroom or anywhere that easy entrance to a shower is required. The Tile Redi MultiCurb product features two of the four sides of its one-piece, pre-formed and pre-pitched shower pans easily accessible to enter or step into the shower. Tile Redi shower pans are manufactured as pre-formed, one-piece moulded modules. Complete with fully integrated drains, curbs and splash walls, each leak-proof unit is pre-pitched for easy drainage. By solving water intrusion problems, Tile Redi shower pans inhibit the growth of mould and mildew.

Magical melange of metallics and textures

Part of Apavisa's Nanotech 4mm collection, Nanoeclectic is based on a mixture of textures and metallic colours, offering a new original and attractive material for designers and interior designers. There are three new colours: copper, black and white, in two finishes: natural and décor, in 300 by 600mm size. Nanoeclectic also offers the Mohave colour in 300 by 600mm, which recreates the appearance of a weathered natural stone, with a wide variation of textures and colours. As complements, there are highly decorative mosaics, mixing different red, black, silver and gold glass colours, offering a bold design statement. Nanoeclectic opens a new world of possibilities, providing new solutions for the design and architecture in a tile range that is just 4.8mm thick.
